GeoTHERM
expo & congress

Freitag, 3. März 2023, 14.45 Uhr
Panorama Saal EDEKA-Arena Kongress 1 - Tiefe Geothermie

Friday, 3 March 2023, 2.45 pm
Panorama Hall EDEKA-Arena congress 1 - Deep Geothermal Energy

How the Eavor-Loop™ extends geothermal potential across Europe

Wie der Eavor-Loop™ das geothermische Potenzial in ganz Europa erweitert

Robert Winsloe, Eavor

Eavor has broken ground in Geretsried, Germany on the first full commercial Eavor-Loop development. Backed by a substantial grant from the European Union and by equity investors from Europe, Asia and the Americas, it will lay the foundation for Eavor-Loop projects across Europe. This paper will illustrate how the Eavor-Loop extends the scalability of geothermal energy in Europe, with a particular focus on decarbonization of district heating networks and large scale power generation.
